

Last episode quiz... :)

Objective: To help us to understand how you are familiar with the Node.js, RESTful API.

Question: Implement and design APIs for login and registration system using Node.js with any framework you want, please submit your quiz as a .zip file of your project via the email.

1. Provide API specification:

Scenario: using OAuth 2.0 Authorization Code Flow

© 2012 SAP AG. All rights reserved.

2

- Can be document or sandbox page or Postman's JSON collection

2. Handle the sad path of APIs:

- Make API to support the return responses for the 200, 400, 404, and 500 status codes.

3. Pick one of API to create a simple Postman's test script which can handle for 200, 400 and 404 status codes.

Good Luck!
